

PROTECT YOUR HOME AGAINST MOSQUITOES

DRAIN STANDING WATER

Help reduce the mosquito population around your property by eliminating standing water.

Here are some spots where water can collect:

Broken down vehicle, garden equipment, any toy or container that can hold water

Leaky faucet

Pool cover that collects water, neglected swimming pool, hot tub or child's wading pool

Tree rot hole or hollow stump

Uncovered boat or boat cover that collects water

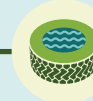

Ornamental pond or fountain (contact us for assistance)

Clogged rain gutter (home and street)

Birdbath (clean weekly)

Junk and discarded tires (drill drain holes in tire swings)

Water trough or pet bowl (refresh regularly)

For free inspection or assistance contact us at **307-637-6475** or visit **Weedandpest.org**
