

THE 5 D'S FOR PREVENTING WEST NILE VIRUS

DAWN & DUSK

When possible, avoid spending time outside at dawn and dusk when mosquitoes are more active.

DRESS

Wear shoes, socks, long pants, and long sleeves when outdoors, especially when mosquitoes are most active. Clothing should be light colored and made of tightly woven materials.

DRAIN

Remove standing water around your property, mosquitoes can develop in any standing water that is present for more than five days.

DEET

For additional protection from mosquitoes, use an insect repellent containing DEET or picaridin. Other insect repellents such as oil of lemon eucalyptus and IR3535 are also registered by the EPA but may be less effective than products containing DEET. It is important to follow the product guidelines when using insect repellent.
